

# *Y-mouse* Dual PS/2 Mouse Adapter (WHYM-0002)

- Accommodates right and left-handed users by placing mice on both sides of a computer
- Switching between devices helps avoid repetitive motion problems
- Daisy chain to attach even more pointing devices at a time

**Use 2 pointing devices from one port!** Simultaneously connect two compatible pointing devices such as standard mice and trackballs. The PS/2 *Y-mouse* also supports most scrolling mice.

The *Y-mouse* Dual PS/2 Mouse Adapter Port works with all systems that support a PS/2 mouse. Both devices need to use similar mouse protocol. Trackballs, Touchpads and Mice are all relative coordinate devices that use similar mouse protocol.

## Specifications

<b>Operating System</b>	All systems compatible with PS/2 mice
<b>Connectors</b>	Two 6 pin PS/2 sockets, one 6 pin PS/2 plug (mini DIN 6)
<b>Dimensions</b>	4" x 2.5" x .75", 100 mm x 63 mm x 20 mm without cord
<b>Weight</b>	2 oz., 60 grams
<b>Power Consumption</b>	Less than 15 ma @ 5 vdc with 2 mice
<b>Power Source</b>	Directly from PS/2 mouse port
<b>Nominal Voltage</b>	5 vdc
<b>Software</b>	Special software is not required
<b>Drivers</b>	Uses default mouse driver
<b>Certification</b>	FCC class B, CE
